PORTFOLIO

Tegan is a passionate Interior Designer interested in modern minimalistic design aswell as spaces with vibrant pops of colour. With a keen eye for detail and an instinct for creating harmonious spaces Tegan has a passion for designing residential and hospitality spaces. Her approach is centred around the use of natural and organic materials, ensuring that sustainability is at the forefront of every project. She believe that great design not only enhances aesthetics but also promotes well-being and a sense of harmony within environments. Through innovative solutions and dedication to eco-friendly practices she strives to transform spaces into inviting, functional havens that reflect her clients unique styles and aspirations.

DOWLING ST, WAREHOUSE

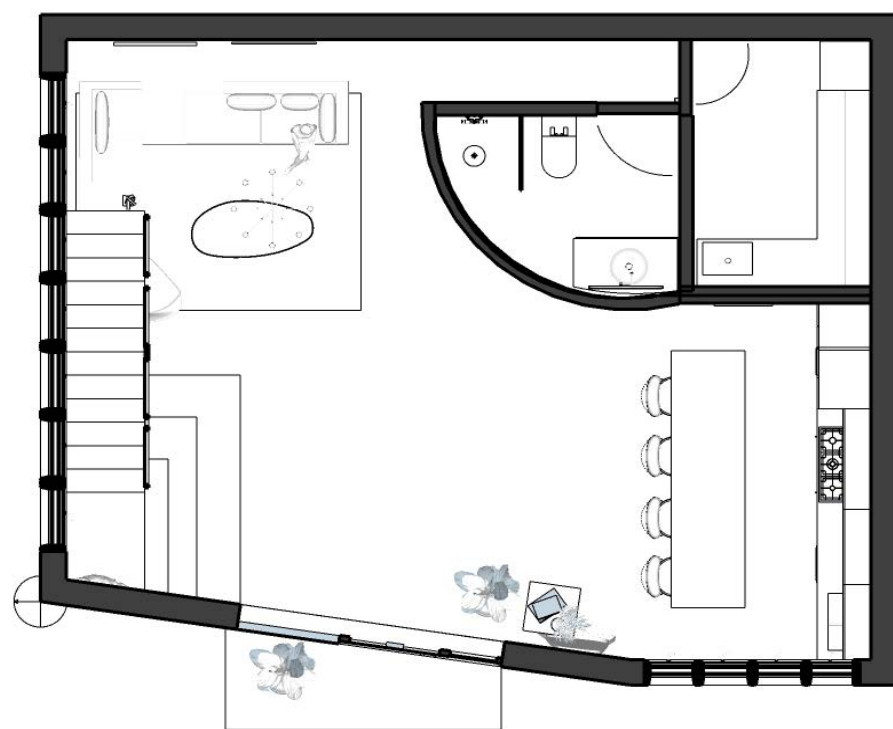

This interior design project transforms a three-story warehouse into a sophisticated and serene environment tailored specifically for a busy fashion designer. By embracing minimalism with a palette of earthy tones accented by strategic pops of black, the space beautifully marries craftsmanship with an organic sensibility. Designed with the designer's lifestyle in mind—frequently traveling and living alone—the layout emphasizes multifunctionality and ease of maintenance. Innovative storage solutions seamlessly blend functionality with aesthetics, ensuring that the space remains organized and inviting. Ultimately, this design creates a sanctuary that fosters creativity and provides a comforting retreat after long absences, perfectly reflecting the designer's artistic vision and personal style.

GEORGE ST, WAREHOUSE

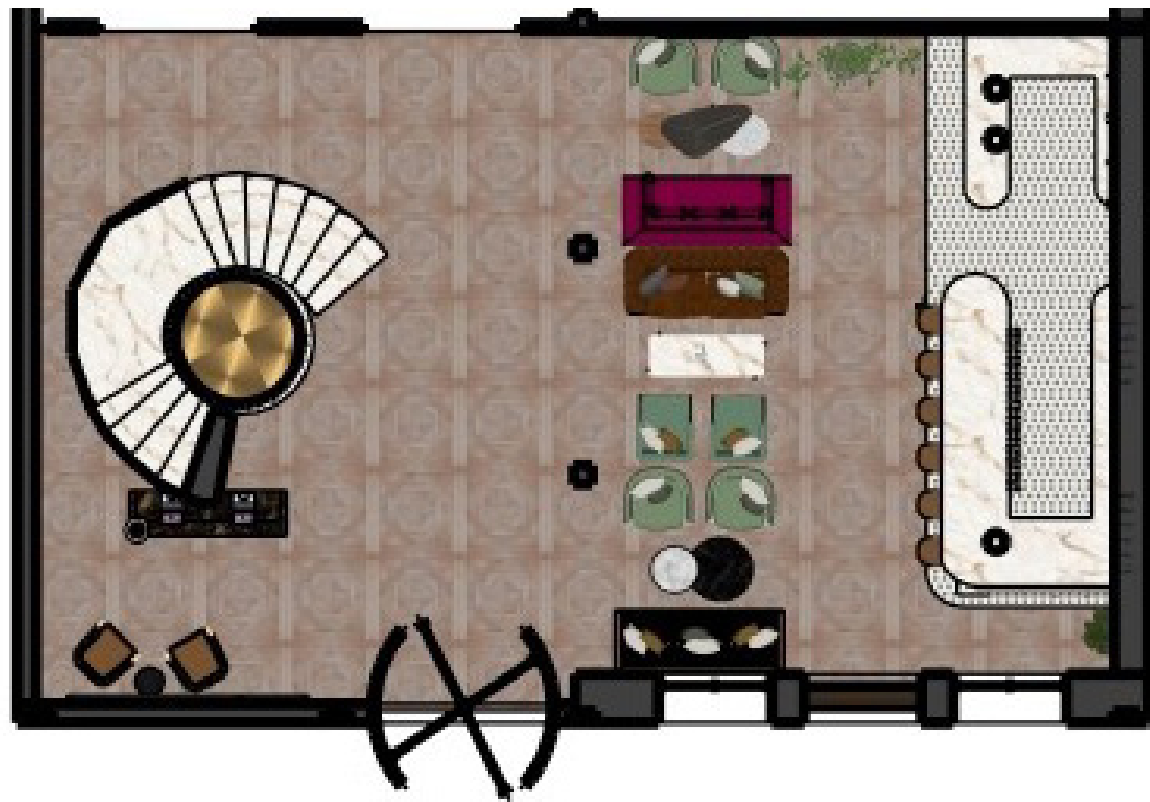

The George St Warehouse, once a bustling factory for an engineering company, offers a unique foundation for transformation. Inspired by the rich history of machinery and movement that once thrived within its walls, this design concept pays homage to the past while reimagining the space for contemporary use. By integrating elements reminiscent of gears and mechanical operations, the design will create an engaging dialogue between history and modernity. The “Mechanisms of Modernity” concept for The George St Warehouse honors the legacy of its engineering past while seamlessly integrating modern design principles. By drawing from historical inspiration, this project will create a dynamic environment that is both functional and aesthetically pleasing, revitalizing the space into a thriving bar/café and innovative design studio that embraces its roots while looking toward the future.

THE VALE

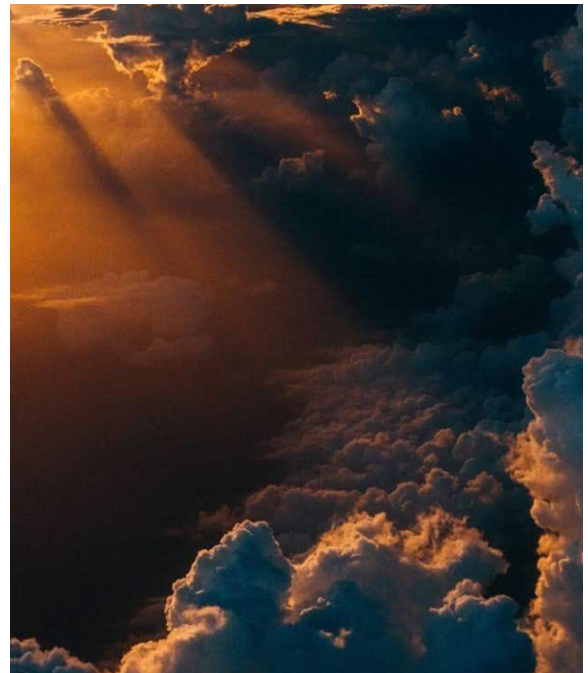

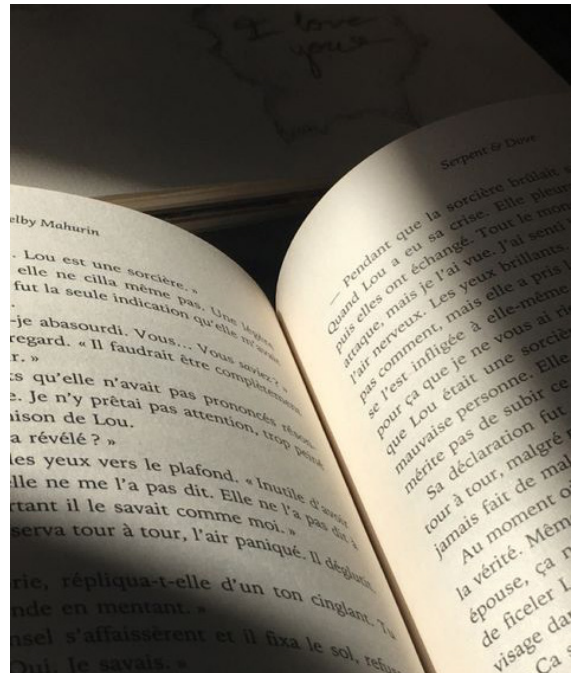

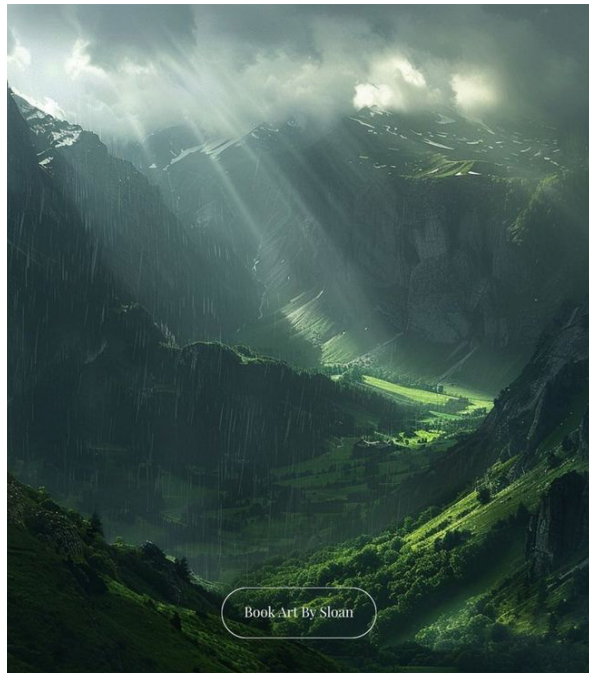

The Vale Hotel is envisioned as a serene retreat that captures the spirit of the Vale of Tempe in ancient Greece—a harmonious sanctuary where guests can pause, reflect, and rejuvenate. Designed to be a gathering space that transcends cultures and backgrounds, The Vale aims to provide a luxurious yet comforting environment that encourages meaningful connections among travelers. This hotel is not just a place to stay; it’s a destination that emphasizes the importance of slowing down and savoring the moments.

Central to the hotel’s concept is a grand library that features floor-to-ceiling bookshelves housing a carefully curated collection of literature from around the world. Comfortable seating areas and hidden nooks will create inviting spaces for quiet reading and reflection. Regularly scheduled book clubs and literary events will encourage social interaction among guests, fostering a sense of community and local authors may be invited for readings or signings, enriching the cultural experience.

The Vale Hotel aspires to be more than just a place to lay one’s head; it is a holistic experience that nurtures the body, mind, and spirit.

This sanctuary stands ready to welcome all who seek a moment of peace amid their travels.
